President Joseph R. Biden, Jr.
The White House
1600 Pennsylvania Avenue NW
Washington, D.C. 20500

Dear President Biden,

We, the undersigned human rights, humanitarian, protection of civilians, peacebuilding, civil liberties, social and racial justice, government accountability, veterans', and faith-based organizations, urge you to lead a much-needed overhaul of U.S. civilian harm policies and practices.¹

Recent *New York Times* investigations into U.S.-caused civilian harm² have documented significant shortcomings in how the U.S. government prevents, investigates, and responds to civilian casualties and damage to civilian objects. These findings illustrate systemic legal and policy flaws that our groups and others have repeatedly raised with the U.S. government for many years.³

For two decades, U.S. operations overseas have killed tens of thousands of civilians around the world – primarily from Brown, Black, and Muslim communities – and exacerbated communities' humanitarian needs. Rather than taking effective action to prevent and respond to these harms, the Defense Department has summarily dismissed countless credible claims of civilian casualties and regularly failed to conduct effective or transparent investigations, learn lessons over time, or provide amends, redress, or meaningful accountability.

As Commander-in-Chief, you have ultimate responsibility for how the U.S. prevents and responds to the civilian harm it causes. While many of the civilian casualties at issue occurred

¹ Many of our groups also sent a letter on these issues to Secretary of Defense Lloyd J. Austin III on December 1, 2021: “NGO Letter to US Secretary of Defense Demands Accountability and Reform After 20 Years of Civilian Harm,” *Center for Civilians in Conflict*, December 1, 2021 [\[link\]](#).

during previous administrations, we urge you to take the opportunity to set a new course that matches your pledges of adherence to human rights, moral leadership, transparency, and accountability.

We ask you to publicly recognize the longstanding structural flaws in how the U.S. mitigates, investigates, and responds to civilian deaths and injuries in its operations, and to take the following needed steps:

- Publicly commit to a detailed plan for how the U.S. government will address the systemic shortcomings raised by civil society groups, the media, and the Defense Department's own studies.⁴
- Prioritize the protection of civilians in your ongoing review of U.S. counterterrorism operations and use of force policy and ensure meaningful civil society consultation in that review.
- Ensure full, independent, and transparent investigations of *all* credible reports of civilian harm, including past reports that may have been erroneously dismissed. Investigations should meet international standards for independence, thoroughness, and impartiality, and should evaluate conduct according to the applicable international human rights and international humanitarian law standards.
- Provide meaningful accountability to civilian victims and survivors of U.S. operations by publicly and transparently acknowledging deaths and injuries, providing amends or redress, and appropriately holding civilian leaders and military commanders responsible for their actions, including by addressing findings of wrongdoing through disciplinary measures or prosecutions.

Through your leadership, the U.S. government can finally account for and reckon with the civilian deaths, injuries, and other harms of the last twenty years. Your legacy and commitment to human rights, humanitarianism, and racial justice globally are at stake, and we urge you to seize this opportunity to act.

Signed,

⁴ On January 27, 2022, Secretary of Defense Lloyd J. Austin III issued a directive mandating certain civilian harm mitigation steps, including a new action plan, the creation of a civilian protection “center of excellence,” and the completion of the long-awaited Department of Defense Instruction on Civilian Harm. These steps are welcome, but their impact and specific resulting actions remain to be seen. We continue to urge the systemic reforms needed to address the longstanding issues raised in this letter.
